

July 2010

Foundation Genetics has custom collected our herd sires for 5 years. Their assistance in making sure the quarantine and entry process is as smooth as possible, is very much appreciated. Foundation understands that many of our bulls are in the middle of their show career and work with us to ensure the bulls' body condition stays the same and that their disposition is not tested.

Foundation has done an excellent job of both national and international semen marketing and shipping on our bulls as well.

Top Meadow Farms is very pleased with the service and expertise we experience at Foundation Genetics.

Mike Geddes, General Manager, Top Meadow Farms
